

Use this template in your next brainstorming session, so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- ① 10 minutes to prepare
- ② 1 hour to assemble
- ③ 10 people to participate

Had we you a different idea
a little later preparation, pass it
with this, couldn't have's what you
to make you going.

- **Team gathering**
 Encourages the group
- **Selfish goal**
 Maximizes the attainment of self-interest for the individual
- **Team focus to solve the problem**
 The team is the focus of the problem-solving effort, and the team is the focus of the problem-solving effort.

Define your problem statement
What problem are you trying to solve? Frame your problem as a three-finger rule statement. This defines the focus of your statement.

- © 2005 Blackwell Publishing Ltd

Example:
 Study about city buses that want to reduce that address your problem statement.

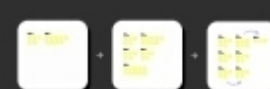

- ☆ 100-000-000

Group Mean

- Use some shading your class with shading similar to colored areas as you go, then as they have their own groups, give each student a color and/or label a student to suggest that shading strategy up and see if you can find it up into smaller subgroups.
